## **What is Chocolate Facial Massage?**

When used topically, chocolate can nourish and moisturize the skin and also remove toxins that have accumulated in the body. Free radicals can damage skin cells and cause premature aging, wrinkles, and age spots. The antioxidants found in chocolate help neutralize these free radicals and protect the skin from ultraviolet rays, pollution, and other environmental toxins. Using a chocolate mask also helps hydrate the skin, improve blood circulation, and collagen production, which postpones the aging of your face.
