

Stem cell facial

Stem cell facial

It has to do with a little known Swiss apple. This treatment restores youth by regenerating your skin's cells using stem cells extracted from a rare endangered Swiss apple that was widely studied for its remarkable self-preservation qualities. Simply said, the type or "genus" of this apple stayed fresh for months! The intense self-regenerating properties stored in the apple's stem cells and were extracted and are the basis for this cutting edge treatment.

This 90-minute treatment includes:

- An Apple Stem Cell Peel using Lactic Acid (milk derived), Phytic Acid (legume derived) and resveratrol (grape derived super anti-oxidant)
- Apple Stem Cells to exfoliate while injecting skin with potent apple stem cells
- Apple Stem Cell Mask which is able to penetrate with the help of LED red light
- NutraSphere Stem Cell Transformer, Sonya Dakar's new luxe treatment cream with apple stem cells and nano-time release technology
